COMC, LLC Receives Emerging Business of the Year Award

Omaha, NE (May 2010) COMC, LLC received the Emerging Business of the Year Award from the Greater Omaha Chamber at the 2010 Omaha 25 Awards Luncheon on Tuesday, May 11, 2010 at the Holiday Inn Omaha Convention Center. COMC, LLC is the maker of Avaire Floors. Avaire is an interlocking floating tile system that allows quick and convenient installation of flooring in homes and businesses.

The Omaha 25 Awards Luncheon recognizes twenty-five Greater Omaha area businesses for their contributions to the positive growth of our business community each year. As the sole recipient of The Emerging Business of the Year Award, COMC, LLC is being recognized as a successful business start-up, which has laid a foundation for future growth and achievement by developing sound business strategy and practices.

COMC, LLC's patent-pending SnapSys Interloc technology allows a fast, convenient installation by way of an interlocking snap system attached to the back of individual porcelain tile pieces. Since starting production in 2006, over four million square feet of product have been installed in the United States. There are now over one thousand retailers that carry the Avaire product. It can be found at independent flooring retailers across the country.

Winning key customers has been one of the challenges that COMC, LLC has met that has helped the company grow. Revenues for the company have increased significantly each year since starting in 2006, and further growth is expected. "We believe that 2010 could be a break-out year for international markets. We are working through the arduous process of becoming a certified product in China and Japan. Furthermore, we have exciting opportunities in the UK, France, Spain, South Africa, and other countries around the world," says Jonathan McIntosh, President and CEO of COMC, LLC.

The increasing demand for COMC, LLC's products has not only meant large growth in sales revenue for the company, but also employment opportunities for people in the Omaha area. Starting from just a single employee in 2006, COMC, LLC now employs about thirty full-time employees.

The work-ethic of our employees, and the work-ethic found at partner companies in the area have been key ingredients of our success,” says McIntosh. “Our goal is to reach \$100M in revenues by 2014, and it is reinforcing to hear top executives from major flooring companies around the world tell us we have created a great product and that we could very well be changing an entire industry.”
